## 'Blue' board to tackle wastewater woes

As reported earlier, the county commissioners are appointing a committee to advise them on designing an entity that would handle regional wastewater issues.

A county press statement outlined the membership: one representative each from the commissioners, the Assembly of Delegates, the Cape Cod Councilor's and Selectmen's Association, the Barnstable County Wastewater Implementation Committee, the Business Roundtable, and the state Department of Environmental Protection as well as a manager of department head of a Cape town with a regional wastewater treatment facility.

Commissioners hope to make appointments by the end of the month and hold the first meeting of the Blue Ribbon Committee on Regional Wastewater in February.
